SKILLS

CHRISTIAN KENECHKWU ANENE

INTERACTION & EXPERIENCE DESIGNER

SUMMARY

Interaction and Experience Designer with a background in Animation and VFX, combining creative storytelling with user-centered design. Experienced in designing interactive systems, prototyping physical and digital interfaces, and translating complex ideas into intuitive user experiences.

Skilled in tools such as Figma, Adobe Creative Suite, and Arduino-based prototyping, with a strong focus on usability, accessibility, and real-world problem solving. Passionate about creating meaningful, human-centered experiences across digital and physical environments.

EXPERIENCE

Assistant Supervisor May 2019 - Present
KILLARNEY PLAZA HOTEL

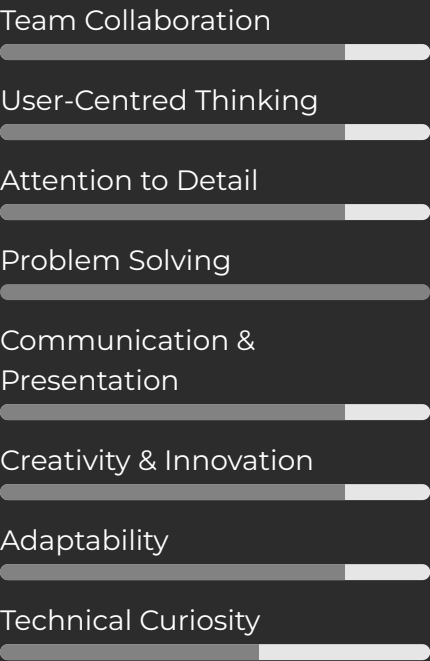

- Supported daily operational management by coordinating team workflows, task allocation, and shift efficiency to ensure smooth hotel operations.
- Monitored service quality and operational standards, contributing to high levels of client satisfaction and consistent guest experiences.
- Conducted detailed inspections of rooms and facilities, ensuring compliance with hospitality standards while identifying opportunities for continuous improvement.
- Assisted in improving overnight operational processes by maintaining clear communication between departments and ensuring timely issue resolution.
- Developed strong leadership, organisational, and problem-solving skills in a fast-paced customer-focused environment.

Media Design Management (Work-Placement) Jan 2023 - Jun 2023
ATTAIN.IE SERVICES

- Assisted in the creation and management of multimedia content across digital and print platforms, ensuring visual consistency and brand alignment.
- Collaborated with the design team to develop engaging multimedia assets for marketing campaigns.

PERSONAL SKILLS

HOBBIES

Arduino & Electronics Prototyping

Digital Design & Creative Experimentation

3D Design & Animation

Exploring UX Trends & Technologies

DIY Projects & Physical Computing

Football

Playing Golf

REFERRAL

Mr Marty Boylan

MTU VFX & Motion Design Dept (Course Leader)

- web: www.mtu.ie
- Email: Marty.Boylan@mtu.ie
- Tel: +353 (0) 66 7145600

- Managed project timelines and workflow coordination to support efficient delivery of creative projects within deadlines.
- Conducted quality assurance reviews on media assets to maintain high production standards and improve content accuracy.
- Supported the organisation and optimisation of digital assets, contributing to improved team workflow and production efficiency.

IT/System Support and Media Management

Oct 2015 - Jun 2018

TRAVELNOW24/7 LTD

- Provided technical support for software, hardware, and network-related issues, ensuring reliable day-to-day business operations.
- Maintained and updated company websites and digital platforms, improving accessibility, functionality, and user experience
- Assisted in managing IT infrastructure, system monitoring, and data organisation to support operational continuity.
- Designed and edited multimedia and marketing materials for digital campaigns, combining technical and creative problem-solving skills.
- Collaborated across departments to troubleshoot technical issues, streamline workflows, and improve digital communication processes.

EDUCATION

Interaction and Experience Design - MA/MSc

Sep 2025 - Present

University of Limerick

BA (Hon) in Animation, VFX & Motion Design

Sep 2020 - Oct 2024

Munster Technological University Tralee Ireland

(Second Class Honours Grade 1)

Network Engineering

Sep 2012 - Sep 2015

National Institute of Infromation Technology (NIIT)

(Diploma)

PROJECTS

AIR QUALITY PROJECT

Mar 2025 - May 2025

Portable Air Quality Monitoring System - Interactive Prototype

Designed and built a real-time air quality monitoring device using Arduino, integrating environmental sensors, visual indicators, and audio feedback.

Mrs Noreen Lyne

Acc-Mgr: Plaza Hotel

- Tel: +353 876551520

Mrs Aoife Sheehy

Mgr: ATTAIN.IE

- Tel: +353 861037945

Mrs Nnenna Osuji

Mgr: TravelNow24/7

- Tel: +234 8037127134

LANGUAGES

- English
- French
-

The system communicates air quality through a multi-modal interface: LCD display, color-coded LEDs, and an alert system. Developed through iterative prototyping, including sketching, physical modelling, and functional testing.

This project demonstrates my ability to design interactive systems that bridge physical and digital experiences, focusing on usability, clarity, and real-world application.

Video Link: <https://www.youtube.com/watch?v=bFUx30mIsFE>

WEARABLE SAFETY DEVICE

Jan 2025 - Mar 2025

Guardian Range Wearable - Safety Interaction System

Designed a wearable safety device aimed at improving situational awareness in public environments. The system uses sensors, LEDs, and real-time feedback to communicate levels of safety to the user.

Developed the concept through prototyping with Arduino, focusing on hands-free interaction and intuitive feedback. This project highlights my ability to design for accessibility, real-world constraints, and user safety.

NAVIGATION APP

Mar 2025 - Apr 2025

Campus Navigation App - UX Design Project

Designed a mobile navigation system tailored for university environments, addressing challenges faced by students and visitors in locating buildings and services.

Conducted user research, defined user journeys, and developed interface prototypes focusing on clarity, usability, and accessibility. This project demonstrates my ability to solve real-world navigation problems through user-centred design.

SMART HOUSE PROJECT

Feb 2024 - May 2024

3D Automated Smart House - Interaction Design Project

Designed a user-centred smart home experience exploring how automation can enhance everyday living. Developed a 3D interactive environment in Maya to simulate responsive systems such as lighting, climate control, and security.

Focused on user interaction flows, anticipating user behaviour, and creating seamless transitions between automated systems. This project demonstrates my ability to translate complex technological systems into intuitive and engaging user experiences.

INTERACTIVE ART

Mar 2025 - Apr 2025

Designing Harmony - Interactive Experience for Social Engagement

Created an interactive installation exploring how design can foster social connection and emotional engagement. Users interact with physical elements that respond dynamically, creating a shared experience.

Focused on user participation, emotional design, and immersive interaction. This project demonstrates my interest in designing meaningful, experience-driven systems beyond traditional interfaces.

LASTA VR PROJECT

May 2025 - Oct 2025

Collaborated on VR visuals and animations in response to artists' paintings.

"Collaborated on an innovation VR project 'LASTA Young Creator Exhibition,' where we brought images artistic paintings to life through immersive visuals and subtle animations. This project, showcased at Siamsa. Pushed the boundaries of creativity and technical skill. offering a unique experience for viewers. Through teamwork and artistic vision. we created an engaging and interactive environment that highlighted the intersection of art and technology."
